

The Department of Public Health, the state's leader in public health policy and advocacy, is the agency which administers Connecticut's Title V program. Title V funding allows the state to address the health concerns of the Maternal and Child populations in areas of need throughout the state through community-based programs and interventions. These programs include Perinatal Case Management Programs (i.e., Right From the Start, Comadrona and Healthy Start), Genetics and Universal Newborn Screening, Children with Special Health Care Needs, School Based Health Centers (SBHC), and Oral Health. These programs address the health needs of the population along the continuum from birth through the reproductive years. Additionally, state capacity supported by Title V funding allows for ongoing planning and policy-making activities regarding the state's MCH population, whether it be within the department, between state agencies, or in other pertinent statewide health care arenas.

MATERNAL & CHILD HEALTH (MCH) MEASURES

Title V - MCH National Performance Measures	State 2004 Results	State 2009 Goal
The percent of newborns who are screened and confirmed with condition(s) mandated by their State-sponsored newborn screening programs (e.g. phenylketonuria and hemoglobinopathies) who receive appropriate follow up as defined by their State.	100.0%	100%
The percent of children with special health care needs age 0 to 18 who receive coordinated, ongoing, comprehensive care within a medical home. (CSHCN Survey)	56.9%	56.9%
Percent of children with special health care needs age 0 to 18 whose families report the community-based service systems are organized so they can use them easily. (CSHCN Survey)	76.8%	76.8%
Percent of 19 to 35 month olds who have received full schedule of age appropriate immunizations against Measles, Mumps, Rubella, Polio, Diphtheria, Tetanus, Pertussis, Haemophilus Influenza, and Hepatitis B.	92.4%	94%
The rate of birth (per 1,000) for teenagers aged 15 through 17 years.	*	12.8
The rate of deaths to children aged 14 years and younger caused by motor vehicle crashes per 100,000 children.	*	0.6
Percentage of mothers who breastfeed their infants at hospital discharge.	73%	73.4%
Percentage of newborns who have been screened for hearing before hospital discharge.	98.0%	99%
The percent of very low birth weight infants among all live births.	*	1.4%
Percent of infants born to pregnant women receiving prenatal care beginning in the first trimester.	*	89.2%
Title V - MCH National Outcome Measures	State 2004 Results	State 2009 Goal
The infant mortality rate per 1,000 live births.	5.3	5.1
The ratio of the black infant mortality rate to the white infant mortality rate.	2.4	1.9
The neonatal mortality rate per 1,000 live births.	3.7	3.5
The postneonatal mortality rate per 1,000 live births.	1.5	1.2
The perinatal mortality rate per 1,000 live births plus fetal deaths.	8.3	8
The child death rate per 100,000 children aged 1 through 14.	13.1	12.9
Title V - Selected MCH State Performance Measures	State 2004 Results	State 2009 Goal
The percentage of CSHCN clients enrolled in the State CSHCN program that have a written health care service plan. (was numbered 25 in a prior year)	91.9%	98%
The degree to which the Connecticut State Department of Public Health improves mental health screening, assessment, referral and linkages to services and supports in Title V funded programs.	10.0	12
Pediatric Mortality due to injury. (The rate of deaths to		

State Population:
3,486,960

Live Births: 42,848

children aged 1-19 caused by unintentional and intentional injury). (Was #22 in a prior year)
